BJR THE BRITISH JOURNAL OF RADIOLOGY
Established 1896

The Editorial Board

Honorary Editors
D M King (Medical)
F A Duck (Scientific)

Diagnostic Radiology
Deputy Editor
G H Whitehouse

Associate Editors
J B Bingham
A M Davies
P Dawson
A H Freeman
P R Goddard
H C Irving
J B Karani
J Pemberton
A M Peters
D W Pilling
J F Reidy
M B Rubens
P J Shorvon
A R Valentine
J Virjee

Physics and Technology
Deputy Editor
C K Bomford

Associate Editors
D R Dance
P C Jackson
R A Shields

Radiotherapy and Oncology
Deputy Editor
D M Tait

Associate Editors
R Beaney
P R Blake
D J Cole
J Glaholm

Radiobiology
Deputy Editor
J W Hopewell

Associate Editors
D Hirst
A J Mill
T E Wheldon

Managing Editor: T R Hogan
Sales & Promotions Manager: H D Smith
Production Editor: J A Rodd
Publications Secretary: R Edwards

Associate Editors Overseas
S G A Chenery (North America); B J Cremin (South Africa); R Fox (Australia); M Takahashi (Japan)

SUBJECT INDEX
1994

RADIODIAGNOSIS
- Bones and joints
- Head and neck (excluding brain)
- Brain
- Spine
- Cardiovascular system
- Respiratory tract
- Liver and biliary tract, pancreas
- Urinary tract
- Haemopoietic, lymphatic, reticulo–endothelial systems, spleen
- Reproductive system
- Endocrine system
- Breast
- Soft tissues
- Paediatrics
- Contrast media and other drugs
- Apparatus and technical aspects
- Organization
- Computed tomography (head)
- Computed tomography (whole body)
- Computed tomography (apparatus and technical aspects)
- Interventional radiology
- Dental radiography

ULTRASOUND
- Clinical aspects
- Apparatus and technical aspects

NUCLEAR MEDICINE
- Clinical aspects
- Apparatus and technical aspects

NUCLEAR MAGNETIC RESONANCE
- Clinical aspects
- Apparatus and technical aspects

PHYSICS AND TECHNOLOGY
- Applied to radiodiagnosis
- Applied to radiotherapy
- Applied to nuclear medicine
- Applied to magnetic resonance
- Applied to ultrasound
- Applied to mammography
- Applied to densitometry

RADIOTHERAPY
- Results and clinical aspects
- Quality assurance
- Planning techniques and new technology
- External beam techniques
- Brachytherapy
- Unsealed sources

CANCER CHEMOTHERAPY

RADIOBIOLOGY
- Dose fractionation/dose rate studies
- Normal tissue responses
- Tumour responses
- Sensitizers and protectors
- Combined treatment modalities
- Other studies

HAZARDS AND PROTECTION
- Radiodiagnosis
- Radiotherapy
- Nuclear medicine
- Legislation and general
- Non-ionizing

EDUCATION

PROCEEDINGS

BOOK REVIEWS

INFORMATION FOR AUTHORS

RADIODIAGNOSIS

Bones and joints

Errors in dual-energy X-ray absorptiometry of the lumbar spine owing to fat distribution and soft tissue thickness during weight change, 71

A newborn case of chondrodysplasia punctata, tibia–metacarpal type (Case report), 97

An investigation of spinal bone mineral density measured laterally: a normal range for UK women, 157

The value of shoulder distention arthrography with intraarticular injection of steroid and local anaesthetic: a follow-up study, 263

Bone metastasis from cholangiocarcinoma showing unusual accumulation on bone scintigraphy and ^{67}Ga scintigraphy (Case report), 303

Calcification within aneurysmal bone cyst (Case report), 306

Magnetic resonance imaging appearances of fatigue fractures of the long bones of the lower limb, 332

Giant cell tumour of metacarpals: report of three cases (Case report), 408

An audit of paediatric technetium-99m methylene diphosphonate bone scans, 552

A technique for measuring the surface area of articular cartilage in acetabular fractures (Technical note), 584

Comparison of technetium-99m nanocolloid and indium-111 leucocytes in the diagnosis of orthopaedic infections (Correspondence), 612

Dual X-ray absoptiometry of the lumbar spine: the precision of paired anteroposterior/lateral studies, 624

The ultrasonic assessment of osteopenia as defined by dual X-ray absorptiometry, 631

INDEX TO VOLUME 67

Variation between os calces as measured by broadband ultrasound attenuation, 636
Diffuse idiopathic skeletal hyperostosis in a young patient (Case of the month), 609
Vertebral measurements for assessment of osteoporosis, 759
Detection of inflammation infection with human polyclonal immunoglobin G labelled with $^{99}Tc^{m}$, 770
Complete photopenia of the femoral head on radionuclide bone scanning in septic arthritis of the hip (Case report), 816
Prone oblique positioning for computed tomographic arthrography of the shoulder, 835
Reproducibility of bone ages when performed by radiology registrars: an audit of Tanner and Whitehouse II *versus* Greulich and Pyle methods, 848
A comparative study of peri-prosthetic bone mineral density measurement using two different dual-energy X-ray absorptiometry systems, 852
Bone SPECT of the wrist (Technical note), 890
Knee effusions, radiology and acute knee trauma, 934
A comparison of a conventional non-ionic contrast medium (iohexol) alone and with adrenaline and an iso-osmolar non-ionic contrast medium (iotrolan) in computed tomographic arthrography of the shoulder, 941
The persistent computed tomography nephrogram: its significance in the diagnosis of contrast-associated nephrotoxicity, 951
The relationship between bone mineral density, vertebral body shape and spinal curvature in the elderly thoracolumbar spine: an *in vitro* study, 969
Uptake of pentavalent technetium-99m dimercaptosuccinic acid by pigmented villonodular synovitis: comparison with computed tomography, magnetic resonance imaging and gallium-67 scintigraphy (Case report), 1030
Reduction of radiation doses in leg lengthening procedures by means of audit and computed tomography scanogram techniques, 1103
Pulled elbow in childhood, 1176
Should broadbend ultrasonic attenuation be normalized for the width of the calcaneus? 1206
Precision and accuracy of measurements of whole body bone mineral: comparisons between Hologic, Lunar and Norland dual-energy X-ray absorptiometers, 1210

Head and neck

(*excluding brain*)

The value of the short tau inversion recovery sequence in magnetic resonance imaging of thyroid eye disease, 244
Scintigraphic evaluation of sialadenitis, 328
Magnetic resonance imaging appearances of fatigue fractures of the long bones of the lower limb, 332
Parotid and parapharyngeal tumours: tissue characterization with dynamic magnetic resonance imaging, 342
The influence of using an atraumatic needle on the incidence of post-myelography headache (Technical note), 396
Magnetic resonance assessment of age-related development of the sphenoid sinus, 431
Digital sialography: imaging and intervention, 524
The radiographic appearances of the larynx on the chest radiograph, 755
Prolonged contrast enhancement of the inner ear on magnetic resonance imaging in Ramsay Hunt syndrome (Case report), 819
Magnetic resonance imaging in Lhermitte–Duclos disease (Case report), 902
Sicca syndrome due to primary amyloidosis (Case report), 1023
Saccular aneurysm of the intraorbital ophthalmic artery (Case report), 1134
A lump in the throat (Case of the month), 1279

Brain

Computed tomography and magnetic resonance in the diagnosis of intraventricular cerebral masses (Review article), 223
Clincal evaluation of fast spin echo sequences for cranial magnetic resonance imaging at 0.5 Tesla, 423
$^{99}Tc^{m}$-HMPAO cerebral scintigraphy and transcranial pulsed Doppler in acute intracranial hypertension in rabbits, 540
Cine magnetic resonance imaging of pulsatile cerebrospinal fluid flow using CSPAMM, 1088
Use of a double inversion recovery pulse sequence to selectively image grey or white brain matter (Technical note), 1258
Asymmetrical development of the gyri recti presenting as a suprasellar mass: case report and description of six further cases (Case report), 1268

Spine

Computed tomographic scanning of L3/4 suspected disc prolapse: is it necessary? 323
Osteosclerotic sarcoidosis of spine and pelvis: plain film and magnetic resonance imaging findings (Case report), 401
A tightening of the belt (Case of the month), 663
Does degenerative disease of the lumbar spine cause arachnoiditis? A magnetic resonance study and review of the literature, 840
Pedicular cleft associated with bilateral pars interarticularis defects and transverse process hypoplasia of a fifth lumbar vertebra (Case report), 1136
A nasty shock on awakening (Case of the month), 1141
Computed tomography of suspected lumbar disc protrusion in a district general hospital: outcome of scanning at L3/4, 1173

Cardiovascular system

Evaluation of tilted, optimized, non-saturating excitation pulses 3D magnetic resonance angiography of the abdominal aorta and major branches in volunteers, 11
Rapid measurement of left ventricular mass by spin echo magnetic resonance imaging (Technical note), 86
Angioplasty gives good results in critical lower limb ischaemia. A 5-year follow-up in patients with known ankle pressure and diabetic status having femoro-popliteal dilatations, 123
Intrapelvic two-dimensional time-of-flight magnetic resonance angiography in healthy and diseases subjects, 140
Mesenteric arterial rupture following blunt abdominal trauma: demonstration by computed tomography (Case report), 206
Malpositioned Hickman line: what to do when all else fails (Correspondence), 217
Plain chest radiographic changes of the absent pulmonary valve syndrome, 248
Laser angioplasty: enough to make your blood boil! 346

The safety of outpatient arteriography using 3F catheters (Correspondence), 514
Factors affecting eye dose during cardiac catheterization (Correspondence), 611
Splenic vein aneurysm — report of a lesion that progressively expanded (Case report), 656
Quantification of atherosclerotic p'aques in carotid arteries by three-dimensional ultrasound, 672
Myocardial velocity gradients detected by Doppler imaging, 679
Presentation of colour flow maps of the peripheral circulation, 689
Aortic distensibility in post-menopausal women receiving Tibolone, 701
A Pensioner's plight (Case of the month), 511
Comparison of hand injection with mechanical injection for digital subtraction selective cerebral angiography, 786
A fishy tale? Carotid artery perforation following a meal of haddock: was the culprit a fish bone? (Case of the month), 825
Venous uptake of $^{99}Tc^{m}$-MIBI during resting cardiac imaging: incidence and the effect of using a flush (Short communication), 827
Computerized strain-gauge plethysmography in the diagnosis of symptomatic and asymptomatic venous thrombosis, 938
Patient radiation doses from enteroclysis examinations, 997
Mesenteric arterial rupture following blunt abdominal trauma: demonstration by computed tomography (Correspondence), 1143
Traumatic aortic rupture: demonstration by magnetic resonance imaging (Case report), 1264

Respiratory tract

Extrathoracic herniation of the lung with a review of the literature (Case report), 94
Comparison of a new dual characteristic film–screen system (Insight) to a standard film–screen system for chest radiology, 162
The reproducibility of bronchial circumference measurements using computed tomography, 257
Comparison of spiral-acquisition computed tomography and conventional computed tomography in the assessment of pulmonary metastatic disease, 436
The computed tomographic features of mediastinal bronchogenic cyst rupture into the bronchial tree (Case report), 589
Pulmonary calcification in smallpox handler's lung (Case report), 599
Pulmonary oedema secondary to laryngospasm following general anaesthesia (Case report), 654
The pulmonary lesions of chickenpox pneumonia — revisited (Case report), 659
Unfit to sit (Case of the month), 411
The admission chest radiograph after acute inhalation injury and burns, 751
The radiographic appearances of the larynx on the chest radiograph, 755
Calculation of dose conversion factors for posterior–anterior chest radiography of adults with a relatively high-energy X-ray spectrum, 775
Iceberg in the pleural space (Case of the month), 909
Ultrasound quantitation of respiratory organ motion in the upper abdomen, 1096
The relationship of pulmonary interstitial emphysema to subsequent type of chronic lung disease, 1155

Alimentary tract

Plain film diagnosis in intussusception, 147
Ultrasound diagnosis of obstructed Roux loop after cancer of the pancreas or bile duct (Case report), 309
Solitary ishaemic small bowel stenosis (Case report), 405
Colonic complication of acute lymphoblastic leukaemia, 449
Rectal infarction after abdominal aortic surgery (Case report), 497
The case of the knotty string (Case of the month), 105
A case of solitary Peutz–Jegher's hamartoma in the small bowel with angiographic evaluation (Case report), 897
Colonic stricture and fibrosis associated with high-strength pancreatic enzymes in a child with cystic fibrosis (Case report), 900
Technetium-99m hexamethylpropyleneamineoxime labelled leucocyte scanning in the initial diagnosis of Crohn's disease, 964
Patient radiation doses from enteroclysis examinations, 997
"But fell like autumn fruit that mellowed long" (John Dryden) (Case of the month), 1033
Mesenteric lymph node cavitation, an unusual complication of coeliac disease (Case report), 1139
Reduction of patient doses from barium meal and barium enema examinations through changes in equipment factors, 1196
Bowel infarction with splenic air embolism: computed tomography findings (Case report), 1272
The "aurora sign" — a new sonographic sign of pneumatosis cystoides intestinalis (Case report), 1275

Liver and biliary tract, pancreas

Identification of inappropriate radiological referrals with suspected gallstones: a prospective audit, 32
Colour Doppler demonstration of pseudoaneurysms complicating pancreatic pseudocysts (Case report), 91
Radiological appearances in peliosis hepatis (Case report), 102
Diagnostic pharmaco-scintigraphy with hepatic intraarterial technetium-99m macroaggregated albumin in the determination of tumour to non-tumour uptake ratio in hepatocellular carcinoma, 136
Magnetic resonance imaging of transfusional hepatic iron overload, 339
Ultrasound findings following laparascopic cholecystectomy, 429
Three dimensional computed tomography cholangiography: a new technique for biliary tract imaging, 445
Hepatocellular carcinoma diagnosed radiologically, treated by transcatheter arterial embolization and limited-field radiotherapy (Case report), 591
Ciliated foregut cyst of the pancreas mimicking teratomatous tumour (Case report), 601
A case of forgetfulness (Case of the month), 215
Localization of lipiodol-radioiodine in hepatic metastases from renal cell carcinoma (Case report), 822
Low-reflectivity periportal collar on hepatic ultrasound, 1050
Hepatic ultrasound findings in the glycogen storage diseases, 1062
Single breath-holding three-dimensional magnetic resonance portography with bolus injection of Gd-DTPA in subjects with normal liver: a comparison with two-dimension time-of-flight technique, 1078
Non-invasive assessment of diffuse liver disease by *in vivo* meas-

urement of proton nuclear magnetic resonance times at 0.08 T, 1083
Intestinal perforation — an unusual complication of endoscopic biliary stenting (Case report), 1270

Urinary tract

What is the nephrogram? 21
Ureteric obstruction secondary to contralateral hydronephrosis (Case report), 100
Bowel preparation before intravenous urography: is it necessary? (Correspondence), 416
New sonographic finding in renal infarction (Case report), 499
Cachexia of the kidney — a cause of pseudo-hydronephrosis (Case report), 596
Entrance surface and ovarian doses in hysterosalpingography, 860
Perinephric-splenic fistula — a complication of percutaneous perinephric abscess drainage (Case report), 894
Renal artery calcification in an allograft (Case report), 907
Imaging studies for emphysematous pyelonephritis (Correspondence), 1036
Iomeprol *versus* iopromide for intravenous urography, 958
Perinephric angiomyolipomas in tuberous sclerosis (Case report),1026
Recurrent upper tract urothelial tumours: the use of loopography following cystectomy for bladder cancer, 1057
Benign urachal neoplasm (Case report), 1132

Haemopoietic, lymphatic, reticulo-endothelial systems, spleen

Intracranial extramedullary haematopoiesis in postpolycythemic myelofibrosis (Case report), 299
Colonic complication of acute lymphoblastic leukaemia, 449
Splenic vein aneurysm — report of a lesion that progressively expanded (Case report), 656
Limb blood flow measurement in technically successful balloon angioplasty, 764
Is there still a role for lymphography in the management of early stage carcinoma of the cervix? 1052

Reproductive system

Intraperitoneal metastases from testicular germ cell tumour (Case report), 501
Transcatheter arterial embolization of obstetric and gynaecological bleeding: efficacy and clinical outcome, 530
The clinical utility of transrectal ultrasound and digital rectal examination in the diagnosis of prostate cancer, 668
Entrance surface and ovarian doses in hysterosalpingography, 860
Physical evaluation of computed radiography as a mammographic X-ray imaging system, 988
Is there still a role for lymphography in the management of early stage carcinoma of the cervix? 1052
Estimation of fetal volume by magnetic resonance imaging and stereology, 1067

Endocrine system

Radiology of stromal sarcoma of the breast with ossifying pleural metastases (Case report), 212
The accuracy of conventional and three-dimensional thallium-technetium scans in patients with hyperparathyroidism resulting from multiglandular hyperplasia, 325
A study of the relationship between patient dose and size in paediatric radiology, 864

Breast

The indeterminate breast mass: assessment using contrast enhanced magnetic resonance imaging, 14
Myeloma of the breast — appearances on ultrasound and colour Doppler (Case report), 399
Measuring image texture to separate "difficult" from "easy" mammograms, 456
A clinical comparison between conventional and digital mammography utilizing computed radiography, 464
Magnetic resonance imaging for volume estimation of large multinodular goitres: a comparison with scintigraphy, 519
Comparative study of dose values and image quality in mammography in the area of Madrid, 556
Measurements of the frequency distribution of optical density in screening mammography, 856
European Society of Mastology Consensus Conference on Breast Screening: Report of the Evaluation Committee, 925
Physical evaluation of computed radiography as a mammographic X-ray imaging system, 988
Dynamic contrast-enhanced and fat suppressed magnetic resonance imaging in suspected recurrent carcinoma of the breast: preliminary experience, 1158
Quantitative magnetic resonance for assessment of radiation fibrosis after post-mastectomy radiotherapy, 1238

Soft tissues

Metastatic testicular teratoma of the thymus (Case report), 203
Unusual ultrasonographic appearance of a solitary retroperitoneal neurofibroma (Case report), 210
Lymphangiomyomatosis with spontaneous peritoneal rupture (Case report), 605
Infantile myofibromatosis — a review, 619
Magnetic resonance neurography of the median nerve, 1169

Paediatrics

The outcome of fetal ventriculomegaly, 26
A newborn case of chondrodysplasia punctata, tibia–metacarpal type (Case report), 97
Plain chest radiographic changes of the absent pulmonary valve syndrome, 248
Energy imparted to neonates during X-ray examinations in a special care baby unit, 366
The selection of age groupings for the results of radiation dose surveys in paediatric radiology (Correspondence), 513
Infantile myofibromatosis — a review, 619
Necklace calcification in an infant: a sign of hypoxia, not of strangulation (Correspondence), 743
The case of the knotty string (Case of the month), 105
A study of the relationship between patient dose and size in paediatric radiology, 864
Estimation of fetal volume by magnetic resonance imaging and stereology, 1067
The relationship of pulmonary interstitial emphysema to subsequent type of chronic lung disease, 1155
Pulled elbow in childhood, 1176

Contrast media and other drugs

Human albumin based echocontrast agents — repeated use in animals may induce anaphylactic reactions (Correspondence), 112

The influence of using an atraumatic needle on the incidence of post-myelography headache (Technical note), 396

A comparison of a conventional non-ionic contrast medium (iohexol) alone and with adrenaline and an iso-osmolar non-ionic contrast medium (iotrolan) in computed tomographic arthrography of the shoulder, 941

The persistent computed tomography nephrogram: its significance in the diagnosis of contrast-associated nephrotoxicity, 951

Iomeprol *versus* iopromide for intravenous urography, 958

Apparatus and technical aspects

Monte Carlo study of grid performance in diagnostic radiology: task dependent optimization for screen–film imaging, 76

Comparison of a new dual characteristic film–screen system (Insight) to a standard film–screen system for chest radiology, 162

Image quality and patient dose for different screen–film combinations, 166

A comparison of mammographic phantoms, 174

Measurement of computed tomography scanner slice widths (Technical note), 200

Shielding requirements in diagnostic radiology (Technical note), 296

A comparison of radiation dose in examination of the abdomen using different radiological imaging techniques, 478

Estimation of effective dose from dose–area product measurements for barium meals and barium enemas, 485

The safety of outpatient arteriography using 3F catheters (Correspondence), 514

Patient effective dose resulting from radiographic examinations, 564

Comparison of hand injection with mechanical injection for digital subtraction selective cerebral angiography, 786

The relationship between bone mineral density, vertebral body shape and spinal curvature in the elderly thoracolumbar spine: an *in vitro* study, 969

Ultrasound quantitation of respiratory organ motion in the upper abdomen, 1096

Reduction of radiation doses in leg lengthening procedures by means of audit and computed tomography scanogram techniques, 1103

Reduction of patient doses from barium meal and barium enema examinations through changes in equipment factors, 1196

Precision and accuracy of measurements of whole body bone mineral: comparisons between Hologic, Lunar and Norland dual-energy X-ray absorptiometers, 1210

Organization

Clinical diagnosis from digital displays: results and conclusions from the St Mary's evaluation project, 1

Identification of inappropriate radiological referrals with suspected gallstones: a prospective audit, 32

Further experience at the Bristol Centre, following the installation of a second MRI unit (Correspondence), 217

EMI patents on computed tomography: history of legal actions (Correspondence), 315

EMI patent litigation in the US (Correspondence), 316

Imlink and continuing medical education: the use of an image transfer system to broadcast teaching cases nationally, 453

An audit of a radiographer based ultrasound service, 665

A comparison of computed tomography practice in 1989 and 1991, 872

Reporting of fracture radiographs by radiographers: the impact of a training programme, 945

Computed tomography
(*head*)

The reproducibility of bronchial circumference measurements using computed tomography, 257

Computed tomography
(*whole body*)

Mesenteric arterial rupture following blunt abdominal trauma: demonstration by computed tomography (Case report), 206

Computed tomography findings in lipoid proteinosis: report of two cases (Case report), 207

Relationship of computed tomography tumour volume to patient survival in carcinoma of the cervix treated by radical radiotherapy, 252

Computed tomographic scanning of L3/4 suspected disc prolapse: is it necessary? 323

Comparison of spiral-acquisition computed tomography and conventional computed tomography in the assessment of pulmonary metastatic disease, 436

Three dimensional computed tomography cholangiography: a new technique for biliary tract imaging, 445

Intraperitoneal metastases from testicular germ cell tumour (Case report), 501

Mediastinal computed tomography in a British Asian population, 535

Should broadbend ultrasonic attenuation be normalized for the width of the calcaneus? 1206

NUCLEAR MEDICINE

Clinical aspects

Diagnostic pharmaco-scintigraphy with hepatic intraarterial technetium-99m macroaggregated albumin in the determination of tumour to non-tumour uptake ratio in hepatocellular carcinoma, 136
Outcome of 249 patients attending a nuclear medicine department with well differentiated thyroid cancer; a 23 year review, 283
Biokinetics and dosimetry for [methyl-^{11}C]thymide, 292
Bone metastasis from cholangiocarcinoma showing unusual accumulation on bone scintigraphy and ^{67}Ga scintigraphy (Case report), 303
The accuracy of conventional and three-dimensional thallium-technetium scans in patients with hyperparathyroidism resulting from multiglandular hyperplasia, 325
Scintigraphic evaluation of sialadenitis, 328
^{67}Ga scintigraphy in HIV antibody positive patients; a review of its clinical usefulness, 349
Uptake of $^{99}Tc^{m}$ methyl diphosphonate in goserelin implant (Correspondence), 415
Correlation of serum prostate specific antigen levels and bone

scintigraphy in carcinoma prostate, 469
Can ^{99m}Tc HMPAO leucocyte scintigraphy distinguish between Crohn's disease and ulcerative colitis? 472
Comparison of technetium-99m nanocolloid and indium-111 leucocytes in the diagnosis of orthopaedic infections (Correspondence), 612
Unfit to sit (Case of the month), 411
Limb blood flow measurement in technically successful balloon angioplasty, 764
Detection of inflammation infection with human polyclonal immunoglobin G labelled with ^{99m}Tc, 770
Complete photpenia of the femoral head on radionuclide bone scanning in septic arthritis of the hip (Case report), 816
Localization of lipiodol-radioiodine in hepatic metastases from renal cell carcinoma (Case report), 822
Venous uptake of ^{99m}Tc-MIBI during resting cardiac imaging: incidence and the effect of using a flush (Short communication), 827
Bone SPECT of the wrist (Technical note), 890
Technetium-99m hexamethylpropyleneamineoxime labelled leucocyte scanning in the initial diagnosis of Crohn's disease, 964
Uptake of pentavalent technetium-99m dimercaptosuccinic acid by pigmented villonodular synovitis: comparison with computed tomography, magnetic resonance imaging and gallium-67 scintigraphy (Case report), 1030
Radioiodine ablation of residual tissue in thyroid cancer: relationship between administered activity, neck uptake and outcome, 1127

Apparatus and technical aspects

Absorbed dose in the skin from beta emitters in medical and laboratory containers, 54
Biokinetics and dosimetry for [methyl-^{11}C]thymide, 292
Can ^{99m}Tc HMPAO leucocyte scintigraphy distinguish between Crohn's disease and ulcerative colitis? 472
^{99m}Tc-HMPAO cerebral scintigraphy and transcranial pulsed Doppler in acute intracranial hypertension in rabbits, 540
Venous uptake of ^{99m}Tc-MIBI during resting cardiac imaging: incidence and the effect of using a flush (Short communication), 827
Bone SPECT of the wrist (Technical note), 890
Single breath-holding three-dimensional magnetic resonance portography with bolus injection of Gd-DTPA in subjects with normal liver: a comparison with two-dimensional time-of-flight technique, 1078

NUCLEAR MAGNETIC RESONANCE

Clinical aspects

Clinical diagnosis from digital displays: results and conclusions from the St Mary's evaluation project, 1
The indeterminate breast mass: assessment using contrast enhanced magnetic resonance imaging, 14
Phosphorus-31 metabolism of human breast — an *in vivo* magnetic resonance spectroscopic study at 1.5 Tesla, 36
Intrapelvic two-dimensional time-of-flight magnetic resonance angiography in healthy and diseases subjects, 140
Computed tomography and magnetic resonance in the diagnosis of intraventricular cerebral masses (Review article), 223
The value of the short tau inversion recovery sequence in magnetic resonance imaging of thyroid eye disease, 244
Magnetic resonance imaging appearances of fatigue fractures of the long bones of the lower limb, 332
Magnetic resonance imaging of transfusional hepatic iron overload, 339
Parotid and parapharyngeal tumours: tissue characterization with dynamic magnetic resonance imaging, 342
Osteosclerotic sarcoidosis of spine and pelvis: plain film and magnetic resonance imaging findings (Case report), 401
Clincal evaluation of fast spin echo sequences for cranial magnetic resonance imaging at 0.5 Tesla, 423
Magnetic resonance assessment of age-related development of the sphenoid sinus, 431
Magnetic resonance imaging for volume estimation of large multinodular goitres; a comparison with scintigraphy, 519
Magnetic resonance imaging of agarose gel phantom for assessment of 3D dose distribution in linac radiosurgery (Technical note), 646
A tightening of the belt (Case of the month), 663
Prolonged contrast enhancement of the inner ear on magnetic resonance imaging in Ramsay Hunt syndrome (Case report), 819
Does degenerative disease of the lumbar spine cause arachnoiditis? A magnetic resonance study and review of the literature, 840
Magnetic resonance imaging in Lhermitte–Duclos disease (Case report), 902
Outcome of 249 patients attending a nuclear medicine department with well differentiated thryroid cancer: a 23 year review (Correspondence), 1035
Magnetic resonance synthesis using a flexible model, 976
The effects of static 3.0 T and 0.5 T magnetic fields and the echo-planar imaging experiment at 0.5 T on *E. coli*, 983
Single breath-holding three-dimensional magnetic resonance portography with bolus injection of Gd-DTPA in subjects with normal liver: a comparison with two-dimension time-of-flight technique, 1078
Non-invasive assessment of diffuse liver disease by *in vivo* measurement of proton nuclear magnetic resonance times at 0.08 T, 1083
Dynamic contrast-enhanced and fat suppressed magnetic resonance imaging in suspected recurrent carcinoma of the breast: preliminary experience, 1158
Magnetic resonance neurography of the median nerve, 1169
Quantitative magnetic resonance for assessment of radiation fibrosis after post-mastectomy radiotherapy, 1238
Traumatic aortic rupture: demonstration by magnetic resonance imaging (Case report), 1264
Asymmetrical development of the gyri recti presenting as a suprasellar mass: case report and description of six further cases (Case report), 1268

Apparatus and technical aspects

Evaluation of tilted, optimized, non-saturating excitation pulses 3D magnetic resonance angiography of the abdominal aorta and major branches in volunteers, 11
Rapid measurement of left ventricular mass by spin echo magnetic resonance imaging (Technical note), 86
Multiparametric classification of muscle T_1 and T_2 relaxation times determined by magnetic resonance imaging. The effects of dynamic exercise in trained and untrained subjects, 150

INDEX TO VOLUME 67

Acoustic noise levels during magnetic resonance scanning at 1.5 T (Short communication), 413

Magnetic resonance imaging of agarose gel phantom for assessment of 3D dose distribution in linac radiosurgery (Technical note), 646

The effect of X-rays on cardiac pacemakers and quartz watches (Correspondence), 416

A simple method for skin/lesion localization using magnetic resonance imaging (Technical note), 813

Magnetic resonance synthesis using a flexible model, 976

Estimation of fetal volume by magnetic resonance imaging and stereology, 1067

Single breath-holding three-dimensional magnetic resonance portography with bolus injection of Gd-DTPA in subjects with normal liver: a comparison with two-dimensional time-of-flight technique, 1078

Non-invasive assessment of diffuse liver disease by *in vivo* measurement of proton nuclear magnetic resonance times at 0.08 T, 1083

Cine magnetic resonance imaging of pulsatile cerebrospinal fluid flow using CSPAMM, 1088

Ultrasound quantitation of respiratory organ motion in the upper abdomen, 1096

Absorbed dose distribution measurements in brachytherapy using ferrous sulphate gel and magnetic resonance imaging, 1121

Reconstruction of images from radiofrequency electron paramagnetic resonance spectra, 1186

Quantitative magnetic resonance for assessment of radiation fibrosis after post-mastectomy radiotherapy, 1238

A moderately sized resonator/surface coil for radiofrequency electron paramagnetic spectroscopy and imaging *in vivo* (Technical note), 1243

Reducing motion artifacts in *in vivo* magnetic resonance imaging measurements of relaxation times (Technical note), 1249

Use of a double inversion recovery pulse sequence to selectively image grey or white brain matter (Technical note), 1258

PHYSICS AND TECHNOLOGY

Applied to radiodiagnosis

Monte Carlo study of grid performance in diagnostic radiology: task dependent optimization for screen–film imaging, 76

Helical computed tomography: where is the cut? (Short communication), 107

Comparison of a new dual characteristic film–screen system (Insight) to a standard film–screen system for chest radiology, 162

Image quality and patient dose for different screen–film combinations, 166

Measurement of computed tomography scanner slice widths (Technical note), 200

Shielding requirements in diagnostic radiology (Technical note), 296

An investigation into the radiation dose associated with different imaging systems for chest radiology, 353

Comparison of two methods for assessing patient dose from computed tomography, 360

Energy imparted to neonates during X-ray examinations in a special care baby unit, 366

A comparison of radiation dose in examination of the abdomen using different radiological imaging techniques, 478

Estimation of effective dose from dose–area product measurements for barium meals and barium enemas, 485

Patient effective dose resulting from radiographic examinations, 564

A technique for measuring the surface area of articular cartilage in acetabular fractures (Technical note), 584

Calculation of dose conversion factors for posterior–anterior chest radiography of adults with a relatively high-energy X-ray spectrum, 775

Comparison of hand injection with mechanical injection for digital subtraction selective cerebral angiography, 786

Entrance surface and ovarian doses in hysterosalpingography, 860

A study of the relationship between patient dose and size in paediatric radiology, 864

A comparison of computed tomography practice in 1989 and 1991, 872

Computerized strain-gauge plethysmography in the diagnosis of symptomatic and asymptomatic venous thrombosis, 938

Physical evaluation of computed radiography as a mammographic X-ray imaging system, 988

Radiation protection in dental radiology (Review article), 1041

Reduction of radiation doses in leg lengthening procedures by means of audit and computed tomography scanogram techniques, 1103

Local control *versus* dose or overall time: from coefficients to percentages, 1108

Reduction of patient doses from barium meal and barium enema examinations through changes in equipment factors, 1196

The siting of consistency checks on mobile image intensifier automatic brightness controls (Correspondence), 1281

Applied to radiotherapy

Re-evaluation of a radiation protection cost benefit analysis study in brachytherapy, 59

Effect of overall time when radiotherapy includes teletherapy and brachytherapy: a mathematical model, 63

Craniospinal axis irradiation: an improved electron technique for irradiation of the spinal axis, 186

Calibration of low-activity caesium tubes and needles traceable to the therapy level standard, 194

The development of an interdepartmental audit as part of a physics quality assurance programme for external beam therapy, 275

A method and contrast–detail phantom for the quantitative assessment of radiotherapy portal imaging systems, 384

Evaluation of a region growing algorithm for segmenting pelvic computed tomography images during radiotherapy planning (Technical note), 392

Effect of tumour shrinkage on the biological effectiveness of permanent brachytherapy implants, 639

An aid to radiation therapy simulation (Technical note), 649

The effect of X-rays on cardiac pacemakers and quartz watches (Correspondence), 416

A mathematical model of intraluminal and intracavitary brachytherapy, 805

A simple method for skin/lesion localization using magnetic resonance imaging (Technical note), 813

Caesium-137 spherical sources for the LDR\MDR Selectron (Correspondence), 830

A proposed figure of merit for the assessment of unscheduled treatment interruptions, 1001
Dosimetry in the moving gap region in craniospinal irradiation (Technical note), 1017
High dose rate *versus* low dose rate brachytherapy for squamous cell carcinoma of the cervix: an economic analysis, 1113
Absorbed dose distribution measurements in brachytherapy using ferrous sulphate gel and magnetic resonance imaging, 1121
Tangential breast irradiation — rationale and methods for improving dosimetry (Invited review), 1149
Results of a questionnaire regarding the practice of radiotherapy for carcinoma of the cervix in the UK, 1226
Non-uniform dwell times in line source high dose rate brachtherapy: physical and radiobiological considerations, 1231

Applied to nuclear medicine

A new method of quantification of the pulmonary regional distribution of aerosols using combined CT and SPECT and its application to nedoromil sodium administered by metred dose inhaler, 46
Absorbed dose in the skin from beta emitters in medical and laboratory containers, 54
Can $^{99}Tc^{m}$ HMPAO leucocyte scintigraphy distinguish between Crohn's disease and ulcerative colitis? 472
An audit of paediatric technetium-99m methylene diphosphonate bone scans, 552
Limb blood flow measurement in technically successful balloon angioplasty, 764
Detection of inflammation infection with human polyclonal immunoglobin G labelled with $^{99}Tc^{m}$, 770
Venous uptake of $^{99}Tc^{m}$-MIBI during resting cardiac imaging: incidence and the effect of using a flush (Short communication), 827
Bone SPECT of the wrist (Technical note), 890
Radioiodine ablation of residual tissue in thyroid cancer: relationship between administered activity, neck uptake and outcome, 1127
Reducing motion artifacts in *in vivo* magnetic resonance imaging measurements of relaxation times (Technical note), 1249

Applied to magnetic resonance

Phosphorus-31 metabolism of human breast — an *in vivo* magnetic resonance spectroscopic study at 1.5 Tesla, 36
Multiparametric classification of muscle T_1 and T_2 relaxation times determined by magnetic resonance imaging. The effects of dynamic exercise in trained and untrained subjects, 150
Magnetic resonance imaging of agarose gel phantom for assessment of 3D dose distribution in linac radiosurgery (Technical note), 646
Ultrasound quantitation of respiratory organ motion in the upper abdomen, 1096
Quantitative magnetic resonance for assessment of radiation fibrosis after post-mastectomy radiotherapy, 1238
A moderately sized resonator/surface coil for radiofrequency electron paramagnetic spectroscopy and imaging *in vivo* (Technical note), 1243

Applied to mammography

A comparison of mammographic phantoms, 174
Quality control in mammography: an initiative in France, 371
Measuring image texture to separate "difficult" from "easy" mammograms, 456
A clinical comparison between conventional and digital mammography utilizing computed radiography, 464
The measurement of mammographic room protection (Technical note), 494
Comparative study of dose values and image quality in mammography in the area of Madrid, 556
Measurements of the frequency distribution of optical density in screening mammography, 856
Physical evaluation of computed radiography as a mammographic X-ray imaging system, 988

Applied to densitometry

Errors in dual-energy X-ray absorptiometry of the lumbar spine owing to fat distribution and soft tissue thickness during weight change, 71
An investigation of spinal bone mineral density measured laterally: a normal range for UK women, 157
Dual X-ray absoptiometry of the lumbar spine: the precision of paired anteroposterior/lateral studies, 624
The ultrasonic assessment of osteopenia as defined by dual X-ray absorptiometry, 631
Variation between os calces as measured by broadband ultrasound attenuation, 636
A comparative study of peri-prosthetic bone mineral density measurement using two different dual-energy X-ray absorptiometry systems, 852
The relationship between bone mineral density, vertebral body shape and spinal curvature in the elderly thoracolumbar spine: an in vitro study, 969
Reduction of radiation doses in leg lengthening procedures by means of audit and computed tomography scanogram techniques, 1103
Should broadbend ultrasonic attenuation be normalized for the width of the calcaneus? 1206
Precision and accuracy of measurements of whole body bone mineral: comparisons between Hologic, Lunar and Norland dual-energy X-ray absorptiometers, 1210

RADIOTHERAPY

Results and clinical aspects

Lung metastasectomy in patients with soft tissue sarcoma, 129
Afterloading radiotherapy for local persistence of nasopharygeal carcinoma, 181
Metastatic testicular teratoma of the thymus (Case report), 203
Radiology of stromal sarcoma of the breast with ossifying pleural metastases (Case report), 212
Relationship of computed tomography tumour volume to patient survival in carcinoma of the cervix treated by radical radiotherapy, 252
Outcome of 249 patients attending a nuclear medicine department with well differentiated thyroid cancer: a 23 year review, 283
The effect of X-rays on cardiac pacemakers and quartz watches (Correspondence), 416
Salvage factionated high dose rate afterloading brachytherapy in the treatment of a recurrent tumour in the middle ear (Case report), 504
Squamous cell carcinoma of the skin in both palms, axillary node,

donor skin graft site and both soles — associated hyperkeratosis and porokeratosis (Case report), 507
Renal morbidity and compensatory renal responses associated with flank radiotherapy in children (Case report), 651
The influence of radiotherapy treatment time on the control of laryngeal cancer: a direct analysis of data from two British Institute of Radiology trials to calculate the lag period and the time factor, 790
The radiosensitizer nicotinamide inhibits arterial vasoconstriction, 795
Localization of lipiodol-radioiodine in hepatic metastases from renal cell carcinoma (Case report), 822
Definitive therapy for prostate carcinoma: Mayo Clinic results at 15 years after treatment, 877
Outcome of 249 patients attending a nuclear medicine department with well differentiated thryroid cancer: a 23 year review (Correspondence), 1035
Cell survival measurements in an argon, aluminium and sulphur filtered neutron beam: a comparison with 24 keV neutrons and relevance to boron neutron capture therapy, 1008
Is there still a role for lymphography in the management of early stage coarcinoma of the cervix? 1052
High dose rate *versus* low dose rate brachytherapy for squamous cell carcinoma of the cervix: an economic analysis, 1113
Tangential breast irradiation — rationale and methods for improving dosimetry (Invited review), 1149
Calculation of radiation induced complication probabilities for brain, liver and kidney, and the use of a reliability model to estimate critical volume fractions, 1218
Results of a questionnaire regarding the practice of radiotherapy for carcinoma of the cervix in the UK, 1226
Quantitative magnetic resonance for assessment of radiation fibrosis after post-mastectomy radiotherapy, 1238

Quality assurance

Calibration of low-activity caesium tubes and needles traceable to the therapy level standard, 194
The development of an interdepartmental audit as part of a physics quality assurance programme for external beam therapy, 275
A method and contrast–detail phantom for the quantitative assessment of radiotherapy portal imaging systems, 384
The depth-dependent radiation response of human melanoma cells exposed to 65 MeV protons, 800
A mathematical model of intraluminal and intracavitary brachytherapy, 805
Dosimetry in the moving gap region in craniospinal irradiation (Technical note), 1017
Local control versus dose or overall time: from coefficients to percentages, 1108

Planning techniques and new technology

Craniospinal axis irradiation: an improved electron technique for irradiation of the spinal axis, 186
A method and contrast–detail phantom for the quantitative assessment of radiotherapy portal imaging systems, 384
Evaluation of a region growing algorithm for segmenting pelvic computed tomography images during radiotherapy planning (Technical note), 392
Magnetic resonance imaging of agarose gel phantom for assessment of 3D dose distribution in linac radiosurgery (Technical note), 646
An aid to radiation therapy simulation (Technical note), 649
Dosimetry in the moving gap region in craniospinal irradiation (Technical note), 1017
Tangential breast irradiation — rationale and methods for improving dosimetry (Invited review), 1149

External beam techniques

Magnetic resonance imaging of agarose gel phantom for assessment of 3D dose distribution in linac radiosurgery (Technical note), 646

Brachytherapy

Reevaluation of a radiation protection cost benefit analysis study in brachytherapy, 59
Afterloading radiotherapy for local persistence of nasopharyngeal carcinoma, 181
Calibration of low-activity caesium tubes and needles traceable to the therapy level standard, 194
Salvage fractionated high dose rate afterloading brachytherapy in the treatment of a recurrent tumour in the middle ear (Case report), 504
Cellular sensitivity and low dose-rate recovery in Fanconi anaemia fibroblasts, 579
Effect of tumour shrinkage on the biological effectiveness of permanent brachytherapy implants, 639
A mathematical model of intraluminal and intracavitary brachytherapy, 805
High dose rate *versus* low dose rate brachytherapy for squamous cell carcinoma of the cervix: an economic analysis, 1113
Absorbed dose distribution measurements in brachytherapy using ferrous sulphate gel and magnetic resonance imaging, 1121
Results of a questionnaire regarding the practice of radiotherapy for carcinoma of the cervix in the UK, 1226
Non-uniform dwell times in line source high dose rate brachtherapy: physical and radiobiological considerations, 1231

Unsealed sources

Outcome of 249 patients attending a nuclear medicine department with well differentiated thyroid cancer; a 23 year review, 283
A mathematical model of intraluminal and intracavitary brachytherapy, 805
Outcome of 249 patients attending a nuclear medicine department with well differentiated thryroid cancer: a 23 year review (Correspondence), 1035
High dose rate *versus* low dose rate brachytherapy for squamous cell carcinoma of the cervix: an economic analysis, 1113
Radioiodine ablation of residual tissue in thyroid cancer: relationship between administered activity, neck uptake and outcome, 1127

CANCER CHEMOTHERAPY

Malpositioned Hickman line: what to do when all else fails (Correspondence), 217

RADIOBIOLOGY

Dose fractionation/ dose rate studies

Effect of overall time when radiotherapy includes teletherapy and brachytherapy: a mathematical model, 63
Pharmacokinetics and efficacy of ^{131}I-meta-iodobenzylguanidine in

two neuroblastoma xenografts, 573
Cellular sensitivity and low dose-rate recovery in Fanconi anaemia fibroblasts, 579
The influence of radiotherapy treatment time on the control of laryngeal cancer: a direct analysis of data from two British Institute of Radiology trials to calculate the lag period and the time factor, 790
The depth-dependent radiation response of human melanoma cells exposed to 65 MeV protons, 800
The effects of static 3.0 T and 0.5 T magnetic fields and the echo-planar imaging experiment at 0.5 T on *E. coli*, 983
A proposed figure of merit for the assessment of unscheduled treatment interruptions, 1001
Cell survival measurements in an argon, aluminium and sulphur filtered neutron beam: a comparison with 24 keV neutrons and relevance to boron neutron capture therapy, 1008
Local control *versus* dose or overall time: from coefficients to percentages, 1108
Results of a questionnaire regarding the practice of radiotherapy for carcinoma of the cervix in the UK, 1226
Non-uniform dwell times in line source high dose rate brachtherapy: physical and radiobiological considerations, 1231

Normal tissue responses

Cellular sensitivity and low dose-rate recovery in Fanconi anaemia fibroblasts, 579
A mathematical model of intraluminal and intracavitary brachytherapy, 805
Calculation of radiation induced complication probabilities for brain, liver and kidney, and the use of a reliability model to estimate critical volume fractions, 1218

Tumour responses

Effect of tumour shrinkage on the biological effectiveness of permanent brachytherapy implants, 639
The radiosensitizer nicotinamide inhibits arterial vasoconstriction, 795
The depth-dependent radiation response of human melanoma cells exposed to 65 MeV protons, 800
A proposed figure of merit for the assessment of unscheduled treatment interruptions, 1001
Cell survival measurements in an argon, aluminium and sulphur filtered neutron beam: a comparison with 24 keV neutrons and relevance to boron neutron capture therapy, 1008
Local control *versus* dose or overall time: from coefficients to percentages, 1108

Sensitizers and protectors

The radiosensitizer nicotinamide inhibits arterial vasoconstriction, 795
Local control *versus* dose or overall time: from coefficients to percentages, 1108

Combined treatment modalities

Non-uniform dwell times in line source high dose rate brachtherapy: physical and radiobiological considerations, 1231

Other studies

The depth-dependent radiation response of human melanoma cells exposed to 65 MeV protons, 800
The effects of static 3.0 T and 0.5 T magnetic fields and the echo-planar imaging experiment at 0.5 T on *E. coli*, 983
Cell survival measurements in an argon, aluminium and sulphur filtered neutron beam: a comparison with 24 keV neutrons and relevance to boron neutron capture therapy, 1008
Calculation of radiation induced complication probabilities for brain, liver and kidney, and the use of a reliability model to estimate critical volume fractions, 1218

HAZARDS AND PROTECTION

Radiodiagnosis

Shielding requirements in diagnostic radiology (Technical note), 296
An investigation into the radiation dose associated with different imaging systems for chest radiology, 353
A comparison of radiation dose in examination of the abdomen using different radiological imaging techniques, 478
Estimation of effective dose from dose–area product measurements for barium meals and barium enemas, 485
The measurement of mammographic room protection (Technical note), 494
The selection of age groupings for the results of radiation dose surveys in paediatric radiology (Correspondence), 513
Comparative study of dose values and image quality in mammography in the area of Madrid, 556
Factors affecting eye dose during cardiac catheterization (Correspondence), 611
Organ absorbed doses in intraoral dental radiography (Correspondence), 744
Comparison of hand injection with mechanical injection for digital subtraction selective cerebral angiography, 786
Entrance surface and ovarian doses in hysterosalpingography, 860
A study of the relationship between patient dose and size in paediatric radiology, 864
Patient radiation doses from enteroclysis examinations, 997
Radiation protection in dental radiology (Review article), 1041
Reduction of radiation doses in leg lengthening procedures by means of audit and computed tomography scanogram techniques, 1103
Reductión of patient doses from barium meal and barium enema examinations through changes in equipment factors, 1196
The siting of consistency checks on mobile image intensifier automatic brightness controls (Correspondence), 1281

Radiotherapy

Re-evaluation of a radiation protection cost benefit analysis study in brachytherapy, 59
The effect of X-rays on cardiac pacemakers and quartz watches (Correspondence), 416

EDUCATION

The case of the knotty string (Case of the month), 105
A case of forgetfulness (Case of the month), 215
Communication makes all the difference (Case of the month), 313
Unfit to sit (Case of the month), 411
A pensioner's plight (Case of the month), 511
Diffuse idiopathic skeletal hyperostosis in a young patient (Case of the month), 609

INDEX TO VOLUME 67

A tightening of the belt (Case of the month), 663
A fishy tale? Carotid artery perforation following a meal of haddock: was the culprit a fish bone? (Case of the month), 825
Iceberg in the pleural space (Case of the month), 911
"But fell like autumn fruit that mellowed long" (John Dryden) (Case of the month), 1033
A nasty shock on awakening (Case of the month), 1141
A lump in the throat (Case of the month), 1279

PROCEEDINGS

Proceedings of the British Medical Ultrasound Society 25th Annual Meeting, 706
Progress in *in vivo* magnetic resonance, 30 September 1993, 915
Nuclear rheumatology and metabolic bone disease, 26 October 1993, 1282
Radiotherapy technique, dose and fractionation in breast conserving treatment: current issues, 29 October 1993, 1283
Monitoring of the intratumour environment and its response to therapy, 12 November 1993, 1284
MRA — does it work? 13 December 1993, 1286

BOOK REVIEWS

Armstrong, P and Wastie, M L, *Diagnostic Imaging (3rd edn)*, 604
Beck, A, *Percutaneous Transluminal Angioscopy*, 747
Bergman, S R and Sobel, B E, *Positron Emission Tomography of the Heart*, 20
Blackwell, G G, Cranney, G B and Pohost, G M (Eds), *MRI: Cardiovascular System*, 319
Chen, M Y M, Zagoria, R J, Ott, D J and Gelfand, D W, *Radiology of the Small Bowel*, 156
Costa, T C and Ell, P J, *Brain Blood Flow in Neurology and Psychiatry*, 319
de Valk, J P J, *Integrated Diagnostic Imaging — Digital PACS in Medicine*, 1289
Dyer, R (Ed.), *Handbook of Basic Vascular and Interventional Radiology*, 202
Federle, M, *Yearbook of Diagnostic Radiology*, 1037
Fischer, H W, *The Radiologist's Second Reader*, 115
Fleckenstein, P and Tranum-Jensen, J, *Anatomy in Diagnostic Imaging*, 1145
Frazier Byrne, S and R L Green, *Ultrasound of the Eye and Orbit*, 114
Guly, H R, *Diagnostic Errors in Trauma Care*, 114
Harris, J H, Jr, Harris, W H and Novelline, R A, *The Radiology of Emergency Medicine (3rd edn)*, 747
Hasso, N, *MRI Atlas of the Head and Neck*, 318
Kaiser, W A, *MR Mammography (MRM)*, 318
